

R.K ENGINEERING WORKS

RIGHT
KNOWLEDGE

ABOUT US

R.K ENGINEERING works established in the year 1998 is core machining service provider, we are specialized in all types of material handling components and sewage treatment components, automobile components, forging components, spindles and also other manufacturing industries. Quality and time plays a vital role in our growth, customer is what we focus not the benefits.

OUR SERVICES

We Provide Wide Range Of Machining Services Like

- Shafts
- Rope drums
- Rollers
- Housings
- Pulleys
- Rotor Shafts
- Wheels
- Motor Stampings

All Kinds Of Mass Production, Batch Production

ACHIEVEMENT

Due to growing labour problems we were able to create solution through automation, we started developing rope drums in CNC turning which increased our production and quality and reducing the human effort around 70 percent.

VALUE'S

- Quality plays a vital role.
- Customer is our prime focus not the benefits.
- Time and tide wait for none.
- Not taking risks is the biggest failure.

We are happy to serve you in this rapidly changing mechanical world.
